

ASTERACEAE (COMPOSITAE)
Achillea millefolium L.
Acmi

common yarrow

FORM: Aromatic, rhizomatous, deciduous, perennial forb, 1-10dm (4-39in) tall.

LEAVES: Alternate, slender, finely pinnately dissected fernlike leaves; basal leaves petiolate, cauline leaves without petioles.

FLOWERS: White (sometimes pink), heads in flat to round-topped clusters; April-Oct.

FRUIT: Compressed achene.

ENEMIES: Fire: moderately resistant, regeneration from seeds to preburn levels within 5-10 years.

HABITAT: Common throughout warm, dry habitats; invades most other disturbed sites.

NOTES: Dried leaves, seeds and flowers used for tea.
